IN THE CLAIMS

Claim 1 (original) In a grip for the handle of an impact imparting device, a flexible strip comprising:

- a polyurethane layer having its lower surface bonded to the upper surface of a felt layer;
- a recessed reinforcement surface formed on a first side edge of the polyurethane layer;
- the felt layer of the first side edge being slanted upwardly and outwardly from the underside of the felt layer;
- a compressed densified area formed on the second side edge of the polyurethane layer;
- the second side of the strip slanting upwardly and outwardly from the underside of the felt layer;
- an adhesive on the underside of the felt layer; and
- the underside of the second side edge of the strip being adhesively engageable with the upper surface of the first side edge of the strip to form a smooth watertight juncture between such first and second side edges of the strip.
